

Email Feedback Received about the Medical Humanities Symposium Jan 2017

Today was a refreshing and renewing time that I am so glad I was able to share... MS2

This symposium was a great way to highlight UCI... the turnout was great and the students seemed to enjoy the symposium – Faculty

I truly felt this was the message this conference shared – Inclusion and Ascension. The undergrads that came shared their new hope for medicine and medical school because of this component that highlights and balances the delicate intricacies this arduous path has in store for us... MS1

The Medical Humanities Symposium... really gave us a glimpse into the necessity to maintain a positive disposition in the most dire of cases and situations and the ability to heal not just through modern medicine, but through the use of our shared narratives and cultural heritage. Through stories and through art we can have a positive impact on our patients that in turn has positive impact on their well being and quality of life! – UCI pre-med post-bacc
