Not at all		Somewhat		Very

llll   lllllllllllllllllllllllll=135

5. I **would recommend this course to other medical students x=5.0**

1	2	3	4	5
Not at all		Somewhat		Very

1lllllllllllllllllllllllllllll=135

PLEASE ADD ADDITIONAL COMMENTS:
Overall a fantastic course that has allowed me to integrate myself and my individual components into a whole, well-rounded physician. Thank You!

This was a terrific course. Extremely insightful, and thought-provoking.

Wonderful class and experience that I will remember for the rest of my career.

Great teachers make for a great course!

Excellent – loved it

I enjoyed the class discussions and I really enjoyed seeing everyone's project at the end. Thanks!

Thank you. I thought this course was very helpful in my education and own personal growth.

I got much more out of the course than I had expected and learned a lot about myself.

Thank you Dr. S. for being an amazing instructor. You've taught me a lot about becoming a better physician throughout the years and I really appreciate all your help. And thanks for the cookies!

Wonderful course. Best parts: student participation. I didn't like it when the lectures went on too long or had too many graphs, too much data. I'd say more student participation!

Thanks for all your time, support, and encouragement. A great course, which will help me throughout my career.

Absolutely wonderful experience. So glad I did it and would definitely support anyone taking it!

Wonderful course! Loved every minute of it! Thank you!

I think this has been one of the best memories I've had of medical school. Thank you so much!!!

The AoD class was amazing. I am so glad that I was able to attend this course. I know that the things I learned will serve me well in my future career and in life in general.

AoD is a great course. I found it very enjoyable and very valuable to my medical education. Thank you so much for giving us the opportunity to take this class and for taking the time to teach us.

This was one of my favorite experiences at UCI. The way the course was designed to encourage self-exploration after going through med school was unbelievably helpful. I feel that every medical student would benefit from this course. The instructors were incredibly supportive, accepting, open and consequently we felt 100% comfortable sharing our true feelings/fears in a way we have never been able to in the past. Just being able to expose ourselves and realize that others were having similar issues and still be supported by faculty was amazing! Thank you so much for teaching me so much about myself, my peers, the world of medicine and how to be a better person!

A wonderful course that comes at just the right time in medical education – it really helped me reflect on the experiences that I have had and to truly understand how to integrate the different parts of myself into my practice as a physician. I received great support and wonderful and prompt feedback on all the assignments and felt like a lot of

effort was put into helping us grow and learn within the class and from each other's experiences and ideas. I think all students should be required to take this class.

THANK YOU!
