

FM REVIEW 2009-2012 26

Comments to Editor: This revision has incorporated all reviewer recommended changes, including using the first person perspective, eliminating the repetitious word "new," and more distinctive phrasing. I support acceptance, with one further minor change as noted below.

Comments to Author: Thank you for this revision, which is more vibrant and engaging. I request that you consider a different adjective for the phrase "magnificent change" which sounds rather trite to me. What about astonishing, breathtaking, inspiring, humbling? Or something else. Otherwise, very well done!
