

FM REVIEW 2011 2A

COMMENTS TO EDITOR: The author has done a good job of responding to reviewer concerns. She has reduced the number of sentences with "I" and has eliminated some of the more cloying commentary. She has also added more direct quotes from the patients, which helps a lot. The writing is still pretty pedestrian, but she's given it a good faith effort. As I said in my earlier comments, I think it's really important to share stories about urban practices, especially those that are succeeding across culture. Let's go with this!

COMMENTS TO AUTHOR: Thank you for your conscientious revisions. I especially liked the direct quotes from your patients, it brought the way you care for this extended family to life.
